**PLEASE CIRCLE YOUR CHOICE: Reset Served Values:      YES                  NO**

**NOTE:** Resetting Served Values means the “Y” in the served column will be reset to N and you must manually code students with the “Y” who have been IDENTIFIED as gifted IF they were served this year. Some districts like to clear this out and start fresh each year and some prefer to manually maintain this data and not clear out this field. Please let us know your preference by circling YES to clear out all “Y’s” in the Served Column on all gifted records of students who have been identified as gifted, or NO to NOT clear out all “Y’s” in the Served Column on all gifted records of students who have been identified as gifted.
