

Installation Instructions for Persona Web based Terminal Emulation Software

Your system must have the following hardware and software in place before running Persona:

- * Netscape Navigator 3.01 or greater OR
Microsoft Internet Explorer 3.02a or greater
- * Workstation must be running in 256 color mode or greater
- * 16 MB of memory

The following instructions were written installing Persona using Internet Explorer on a Windows machine. **Disclaimer:** your 'mileage' may vary.

Start Internet Explorer

Point the browser to terminal.mdeca.org/persona

Persona Sessions will appear

Click on mdeca5.mdeca.org

Review the instructions; click on 'Download now' at the bottom of the page

Save the program to disk on your desktop

Close the browser

Click on Persona_WC3.exe on your desktop to install Persona

Choose all the defaults

**** IMPORTANT ** DO NOT CLOSE THE INSTALLATION WINDOW!**
It will close on it's own in a few seconds when installation is complete.

Reboot your PC

Once your machine reboots, click & drag the Persona_WC3.exe to Recycle Bin

To create a desktop shortcut icon:

Click START

Programs

Persona Client

Highlight 'Persona Windows Client' and right click your mouse

Choose 'Create shortcut'

Highlight 'Persona Windows Client 2'

Click & drag to your desktop

Click on the shortcut icon to start Persona

Log on using your MDECA5 username and password.
